

POOL SAFETY BARRIER INSPECTION & CERTIFICATION

 **0458 287 108**

We offer professional Pool Safety Barrier Inspection & Certification services supported by formal national SPASA Australian Training & Accreditation (SPASA Accredited PSIREG001—Pool Safety Inspection) backed up with SA Builders Licence.

Emergency

Call
out

Our formal training and industry experience provides our certification personnel with the skills and knowledge to professionally and accurately inspect and certify your pool safety barrier.

Issues such as gates not self-closing/self-latching can be caused by deteriorated hinges and latches; or by obstructions such as over grown shrubs. These areas are quickly identified and solutions provided.

We provide:

- comprehensive report on findings
- qualified trades to action improvements
- formal certification
- and more!

Upon inspection of your pool safety barrier and confirmation that it conforms to Australian Standards a formal letter of certification will be issued.
